About the Building

Mozart's Interactive Museum is housed in the historic three-story building "At the Golden Grape," located on the corner of Karmelitská Street and Malostranské Square. Originally a Gothic house, it was rebuilt in its current Baroque form at the beginning of the 18th century. A large number of original Baroque stuccoes have been preserved, and the façade features a typical house sign. From the upper-floor windows, there is a stunning view of St. Nicholas Church and the rooftops of the surrounding houses and palaces.
